Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation $\mathrm{S}-\mathrm{K}$ is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form $10-\mathrm{K}$ or any amendment to this Form $10-\mathrm{K}$.

As of March 5, 2000, 3,282,449 shares of common stock of the registrant were outstanding; the aggregate market value of the shares of common stock of the registrant held by non-affiliates was approximately $\$ 50,002,000$ based upon the Nasdaq Stock Market closing price of \$20.00 for March 5, 2001.

DOCUMENTS INCORPORATED BY REFERENCE

1. Portions of Registrant's Proxy Statement for the Annual Meeting of Shareholders to be held on April 16, 2001 is incorporated by reference in Part III hereof.

ITEM 1. BUSINESS

## DESCRIPTION OF BUSINESS

Cass Information Systems, Inc. ("Cass" or "the Company") is a leading provider of information processing services to large manufacturing, chemical, food, personal products, and retail enterprises across the United States. The Company is the nation's largest provider of freight invoice rating, payment, audit, cost accounting and transportation information to many of the nation's largest companies. It is also the largest processor and payer of utility invoices, including electricity, gas, water, telephone and refuse collection. Cass extracts, stores and presents information from freight and utility invoices, assisting our customers' traffic and energy managers in making decisions that will enable them to improve their operating performance. Cass utilizes web, Internet and browser technology in all of its systems. It heavily utilizes electronic commerce in moving over \$8 billion of transactions annually. It is able to bring financial and transaction processing components together in a single process. As an information processing company, Cass focuses on these critical business areas: Data Acquisition, Data Warehousing and Data Delivery. The Company receives data from multiple sources, electronic and otherwise, and processes the data to accomplish specific operating requirements of its customers. It then makes the data available in a central repository for access and archiving. Finally, the data is turned into information through the Company's databases that communicate with clients as required and provide internet-based methods and tools for analytical processing. Cass offers some of its services as an Application Service Provider (ASP). In addition, the Company, through its wholly owned bank subsidiary Cass Commercial Bank ("the Bank"), provides banking services in the commercial, industrial and residential areas it serves. Its primary focus is to support the Company's payment operations, and it also provides banking services to its target markets, which include privately owned businesses and churches and church-related ministries. Services include commercial, real estate and personal loans; checking, savings and time deposit accounts and other cash management services.

An important component of the Company's services is the financial control and stability for handling the billions of dollars of payments and the infrastructure for electronic funds transfers (EFT). The Company's wholly owned subsidiary, Cass Commercial Bank was organized as a Missouri trust company with banking powers in 1906. Its principal banking office is located at 13001 Hollenberg Drive, Bridgeton, Missouri, 63044 and it has five other branches in the St. Louis, Missouri metropolitan area. Due to its ownership of a federally insured commercial bank, the Registrant is a bank holding corporation originally organized in 1982 as Cass Commercial Corporation under the laws of Missouri and approved by the Board of Governors of the Federal Reserve System (the "FRB") in February 1983. On January 9, 2001 the Company's subsidiary, Cass Information Systems, Inc. was merged into the parent company, Cass Commercial Corporation, and the parent's name was subsequently changed to Cass Information Systems, Inc. As of December 31, 2000, the Company owned $100 \%$ of the outstanding shares of common stock of Cass Commercial Bank. The main operating location of the Company is at 13001 Hollenberg Drive, Bridgeton, Missouri. Other operating locations are in Columbus, Ohio; Chicago, Illinois and Boston, Massachusetts.

## MARKETING, CUSTOMERS AND COMPETITION

The Company believes it is the largest firm in the freight bill payment industry based on the total dollars of freight bills paid. Competition consists of five primary competitors and numerous small freight bill audit firms located throughout the United States. While offering freight payment services, few of these audit firms compete on a national basis. The Company also competes with several companies, located throughout the United States, that pay utility bills and provide extensive management reporting. Available data indicates that the Company is also the largest provider of utility information processing and payment services. Due to the fact that this is a new market, the competitive environment for utility bill processing and payment is difficult to assess and is changing rapidly. The Company appears to have five or six firms that provide comparable services. Most of these are regulated subsidiaries of Public Utility companies. There is consolidation occurring among these companies and Cass now provides processing services as an ASP for many Energy Service Providers (ESP). In December 2000, the Company entered into an agreement to purchase the assets of "The Utility Navigator(R)" a division of privately held Insite Services, Inc. (see subsequent events, in Part II, Item 7 "Management's Discussion and Analysis of Financial Condition and Results of Operations"). This will add new ESP's for the Company's product as well as provide additional processing growth.

The Company's bank subsidiary encounters substantial competition from other banks located throughout the St. Louis metropolitan area. Savings banks, credit unions, other financial institutions and non-bank providers of financial services also provide competition. The principal competition however, is represented by bank holding
company affiliates, many of which are larger and have greater resources than the Bank, and are able to offer a wide range of banking and related services through extensive branch networks.

The Company owns several service marks for the freight payment services and logistics information software it provides. Those marks deemed the most valuable are "Freightpay", the basic freight payment service and "Ratemaker", a rate maintenance service. In addition, the Company either owns or has applied for other service marks.

The Company is not dependent on any one customer for a large portion of its business. It has a varied client base with no individual client exceeding $10 \%$ of total revenue. The Bank is also not dependent on any one customer. The Bank does however, target its services to privately-held businesses located in the St. Louis, MO area and church and church related institutions located in St. Louis, MO and other selected cities located throughout the United States.

## EMPLOYEES

The Company had 618 full-time and 84 part-time employees as of December 31, 2000. Of these employees, the bank subsidiary had 71 full-time and 7 part-time employees.

## SUPERVISION AND REGULATION

The Company and its bank subsidiary are extensively regulated under federal and state law. These laws and regulations are intended to protect depositors, not shareholders. The Bank is subject to regulation and supervision by the Missouri Division of Finance, the FRB and the Federal Deposit Insurance Corporation (the "FDIC"). The Company is a bank holding company within the meaning of the Bank Holding Company Act of 1956, as amended, and as such, it is subject to regulation, supervision and examination by the $\operatorname{FRB}$. The Company is required to file quarterly and annual reports with the FRB and to provide to the FRB such additional information as the FRB may require, and it is subject to regular inspections by the FRB. Bank regulatory agencies use Capital Adequacy Guidelines in their examination and regulation of bank holding companies and banks. If the capital falls below the minimum levels established by these guidelines, the agencies may force certain remedial action to be taken. The Capital Adequacy Guidelines are of several types and include risk-based capital guidelines, which are designed to make capital requirements more sensitive to various risk profiles and account for off-balance sheet exposure; guidelines which consider market risk, which is the risk of loss due to change in value of assets and liabilities due to changes in interest rates; and guidelines that use a leverage ratio which places a constraint on the maximum degree of risk to which a bank holding company may leverage its equity capital base. For further discussion of the capital adequacy guidelines and ratio, please see Part II, Item 7 "Management's Discussion and Analysis of Financial Condition and Results of Operations."

The FRB also has extensive enforcement authority over bank holding companies, including, among other things, the ability to assess civil money penalties, to issue cease and desist or removal orders and to require that a holding company divest subsidiaries (including its bank subsidiaries). In general, enforcement actions may be initiated for violations of law or regulations or for unsafe or unsound practices. Both the FRB and Missouri Division of Finance also have restrictions on the amount of dividends that banks and bank holding companies may remit.

As a bank holding company, the Company must obtain prior approval from the FRB before acquiring ownership or control of more than $5 \%$ of the voting shares of another bank or bank holding company or acquiring all or substantially all of the assets of such a company. In many cases, prior approval is also required for the Company to engage in similar acquisitions involving a non-bank company or to engage in new non-bank activities. Any change in applicable laws or regulations may have a material effect on the business and prospects of the Company.

As a bank holding company, the Company must obtain prior approval from the FRB before acquiring ownership or control of more than 5\% of the voting shares of another bank or bank holding company or acquiring all or substantially all of the assets of such a company. In many cases, prior approval is also required for the Company to engage in similar acquisitions involving a non-bank company or to engage in new non-bank activities. Any change in applicable laws or regulations may have a material effect on the business and prospects of the Company.

## FINANCIAL INFORMATION ABOUT SEGMENTS

The components of net income (loss) along with depreciation and amortization expense, identifiable assets and capital expenditures attributable to each business segment, for the three years ended December 31, 2000 are set forth in Part II, Item 8, Note 12 of this report.

## STATISTICAL DISCLOSURE BY BANK HOLDING COMPANIES

 Operations".The Company's headquarters are located at 13001 Hollenberg Drive, Bridgeton, Missouri. This location is owned by the Company, and includes a building with approximately 61,500 square feet of office space, 20,500 of which is occupied by the Bank. In November 2000 the Company purchased a production facility of approximately 45,500 square feet in Columbus, Ohio, which the Company expects to occupy in the early part of 2001. Currently the Company operates a production facility in Columbus where approximately 26,000 square feet are leased. This space is located at 2545 Farmers Drive, Columbus, Ohio. The Company operates an additional production facility in Lowell, Massachusetts where approximately 25,800 square feet of office space is leased through October 31, 2005. The Company also leases a facility for its rating and software group in Chicago, Illinois where approximately 1,285 square feet of office space is leased through the year 2001.

The Company's bank subsidiary's headquarters are located at 13001 Hollenberg Drive, Bridgeton, Missouri, 63044. The Bank leases approximately 20,500 square feet of a 61,500 square foot building owned by the Company. In addition, the Bank owns a banking facility near downtown St. Louis that consists of approximately 1,600 square feet with adjoining drive-up facilities. The Bank has additional leased facilities in Maryland Heights, Missouri (2,500 square feet); Fenton, Missouri (1,250 square feet); Chesterfield, Missouri (2,850 square feet) and downtown St. Louis, Missouri (1,500 square feet).

ITEM 3. LEGAL PROCEEDINGS

The Company and its subsidiaries are not involved in any pending proceedings other than ordinary routine litigation incidental to their businesses. Management believes none of these proceedings, if determined adversely, would have a material effect on the business or financial condition of the Company or its subsidiaries.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS
No matters were submitted to a vote of security holders during the fourth quarter of 2000.

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY AND RELATED

## STOCKHOLDER MATTERS

As of March 5, 2001, there were 246 holders of record of the Company's common stock. The Company's common stock was listed on the Nasdaq Stock Market effective July 1, 1996. High and low bid prices for each quarter of 2000 and 1999 were as follows:

|  |  | 2000 |  | 1999 |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | High | Low | High | Low |
| 1st | Quarter | \$21.188 | \$18.625 | \$25.125 | \$24.500 |
| 2nd | Quarter | 21.500 | 19.000 | 25.000 | 24.250 |
| 3 rd | Quarter | 22.188 | 17.500 | 25.500 | 23.500 |
| 4th | Quarter | 18.875 | 17.125 | 25.750 | 18.625 |

Dividends paid per share by the Company during the two most recent fiscal years were as follows:

|  | 2000 | 1999 |
| :--- | ---: | ---: |
|  | --- | --- |
| March 15 | $\$ .20$ | $\$ .19$ |
| June 15 | .20 | .19 |
| September 15 | .20 | .19 |
| December 15 | 20 | .19 |

## RESULTS OF OPERATIONS

The following discussion and analysis provides information about the financial condition and results of operations of the Company for the years ended December 31, 2000, 1999 and 1998.

## NET INCOME

The Company's consolidated net income, earnings per share and selected ratios for 2000, 1999 and 1998 were as follows:

|  | 2000 | 1999 | 1998 |
| :---: | :---: | :---: | :---: |
| Net income | \$7,147, 000 | \$6,198, 000 | \$7,408, 000 |
| Basic earnings per share | \$2.05 | \$1.63 | \$1.92 |
| Diluted earnings per share | \$2.02 | \$1.61 | \$1.89 |
| Return on average assets | 1.39\% | 1.26\% | 1.58\% |
| Return on average equity | 13.16\% | 10.85\% | 13.41\% |
| Ratio of average total shareholders' equity to average total assets | 10.54\% | 11.62\% | 11.77\% |
| Ratio of total dividends declared to net income | 38.95\% | 46.61\% | 37.55\% |

The 2000 results compared to 1999 include the following significant pre-tax components:

Net interest income after provision for loan losses increased $\$ 4,621,000$ or $17.4 \%$ due to a $\$ 22,935,000$ increase in average earning assets, a $\$ 69,220,000$ increase in average loans outstanding and a rise in the general level of interest rates, which more than offset a $\$ 750,000$ increase in the provision for loan losses.

Total noninterest income decreased $\$ 330,000$ or $1.5 \%$ due to several factors. Total freight and utility payment and processing fees decreased $\$ 136,000$ or $.7 \%$ despite a $\$ 749,000$ increase in revenue from utility payment and processing services. The decrease in revenue from freight payment and processing services was due to several factors. First, there was a decrease in non-recurring other miscellaneous freight fees. Second, there were continued anticipated decreases of some freight payment services that were part of a prior acquisition. Finally, a greater percentage of payment and processing revenue was obtained from investible balances generated rather than from fees. Bank service fees increased $\$ 238,000$ or $20.7 \%$ due to a significant increase in the Bank's customer base.

Total noninterest expense increased $\$ 2,892,000$ or $7.5 \%$ due to several factors. The most significant was the Company's investment in the utility processing area and in new freight processing capabilities. Due to the rapid growth in the utility processing area, the Company was unable to leverage freight processing resources to the extent that was initially envisioned. As a result, a much larger investment in staff and processing support had to be made to accommodate the fast rate of growth. It is estimated that the pre-tax loss on utility payment processing services was approximately \$500,000. In addition, the Company invested heavily in Internet system capabilities and internal system development in the freight processing area that will allow greater growth in this area in the future. Finally, annual salary increases and higher benefit expenses accounted for a significant part of the increase.

The 1999 results compared to 1998 include the following significant pre-tax components:

Net interest income after provision for loan losses increased \$746,000 or $2.9 \%$ due to a $\$ 45,667,000$ increase in average loans and a \$22,032,000 increase in average earning assets, which were partially offset by a decline in the general level of interest rates.

Total noninterest income decreased $\$ 1,003,000$ or $4.5 \%$ due to several factors. Total freight and utility payment and processing revenue decreased $\$ 583,000$ or $3.1 \%$ despite a $\$ 726,000$ increase in revenue from utility payment and processing services. The decrease in revenue from freight payment and processing services was due to several factors. First, there was a decrease in the volume of freight transactions due largely to the growth in competition for electronic data interchange (EDI) processing of parcel and air shipments. Second, there were continued anticipated decreases of some freight payment services that were
part of a prior acquisition. Finally, the implementation of new prospects, which typically exceed lost business, appeared to be delayed by our prospect's Y2K remediation programs. Freight rating services revenue decreased $\$ 346,000$ or $16.1 \%$ due to a change in Company direction from selling rating software to Internet-based systems. Bank service fees increased $\$ 283,000$ or $32.8 \%$ due to an increase in the Bank's customer base. Finally, the Company recognized a $\$ 285,000$ gain on the sale of securities in 1998.

Total noninterest expense increased $\$ 1,719,000$ or $4.7 \%$ due to several factors. The most significant was the Company's investment in the utility processing area and in new freight processing capabilities. Due to the rapid growth in the utility processing area, the Company was unable to leverage freight processing resources to the extent that was initially envisioned. As a result, a much larger investment in staff and processing support had to be made to accommodate the fast rate of growth. It is estimated that the pre-tax loss on utility payment processing services exceeded $\$ 1,000,000$. In addition, the Company invested heavily in Internet system capabilities and internal system development in the freight processing area that will allow greater growth in this area in the future. Finally, annual salary increases and higher benefit expenses accounted for a significant part of the increase.

## NET INTEREST INCOME

Net interest income is the difference between interest earned on loans, investments, and other earning assets and interest paid on deposits and other interest-bearing liabilities. Net interest income is a significant source of the Company's revenues.

Net interest income in 2000 compared to 1999:
On a tax-equivalent basis, net interest income for 2000 totaled $\$ 32,111,000$, an increase of $\$ 5,390,000$ or $20.2 \%$ over 1999 . The net interest margin for 2000 was $6.70 \%$ compared to $5.87 \%$ in 1999. The following factors account for this increase in net interest income and net interest margin:

Total average earning assets increased \$22,935,000 or 5.0\% to $\$ 478,122,000$. This increase was due mainly to an increase in accounts and drafts payable resulting from an increase in dollars processed. This increase, combined with a rise in the general level of interest rates, contributed to the increase in net interest income.

Total average loans increased $\$ 69,220,000$ or $26.8 \%$ to $\$ 327,962,000$. This increase was attributable to new business relationships and funded by the increase in payables along with a decrease in federal funds sold and other short-term investments. This increase in loans increased interest income and had a positive effect on the net interest margin due to the fact that loans are the Company's highest yielding earning asset.

Total average federal funds sold and other short-term investments decreased $\$ 51,658,000$ or $43.9 \%$ to $\$ 65,884,000$. Since these are the lowest yielding earning assets, decreases in average balances outstanding can decrease interest income, but the reinvestment of these funds in higher yielding assets will increase the average yield on earning assets and therefore interest income and net interest margin.

The net interest margin increased primarily because of the increase in the general level of interest rates and a shift of earning assets from lower yielding federal funds sold and other short-term investments to higher yielding loans and securities. The average yield on earning assets increased to $7.78 \%$ in 2000 from $6.83 \%$ in 1999. The Company is positively affected by increases in the level of interest rates due to the fact that its rate sensitive assets significantly exceed its rate sensitive liabilities. Conversely, the Company is adversely affected by decreases in the level of interest rates. This is primarily due to the noninterest-bearing liabilities generated by the Company in the form of accounts and drafts payable. More information is contained in the tables that follow.

Net interest income in 1999 compared to 1998:
On a tax-equivalent basis, net interest income for 1999 totaled \$26,721,000, an increase of $\$ 833,000$ or $3.2 \%$ over 1998 . The net interest margin for 1999 was $5.87 \%$ compared to $5.98 \%$ in 1998. The following factors account for this increase in net interest income and decrease in net interest margin:

Total average earning assets increased $\$ 22,032,000$ or $5.1 \%$ to $\$ 455,187,000$. This increase was due to an increase in non-interest bearing demand and interest bearing deposits at the Bank resulting from new business development efforts and an increase in accounts and drafts payable at the Company from an
increase in dollars processed. This increase in earning assets contributed to the increase in net interest income.

Total average loans increased $\$ 45,667,000$ or $21.4 \%$ to $\$ 258,742,000$. This increase was funded by the increase in deposits and payables along with the maturity of debt securities. This increase in loans increased interest income and had a positive effect on the net interest margin due to the fact that loans are the Company's highest earning asset.

Total average federal funds sold and other short-term investments increased $\$ 6,737,000$ or $6.1 \%$ to $\$ 117,542,000$. This increase was also funded by the increase in deposits and payables and maturities of debt securities. Since these are the lowest yielding earning assets, increases in average balances outstanding can increase interest income, but reduce the average yield on earning assets and therefore the net interest margin.

Although net interest income increased, the net interest margin decreased primarily because of the decline in the general level of interest rates. The average yield on earning assets decreased to $6.83 \%$ in 1999 from $6.96 \%$ in 1998. The Company is adversely affected by decreases in the level of interest rates due to the fact that its rate sensitive assets significantly exceed its rate sensitive liabilities. Conversely, the Company is positively affected by increases in the level of interest rates. This is primarily due to the noninterest-bearing liabilities generated by the Company in the form of accounts and drafts payable. More information is contained in the tables that follow.

DISTRIBUTION OF ASSETS, LIABILITIES AND STOCKHOLDERS' EQUITY; INTEREST RATE AND INTEREST DIFFERENTIAL

The following table shows the condensed average balance sheets for each of the periods reported, the tax-equivalent interest income and expense on each category of interest-earning assets and interest-bearing liabilities, and the average yield on such categories of interest-earning assets and the average rates paid on such categories of interest-bearing liabilities for each of the periods reported.

1. Balances shown are daily averages.
2. For purposes of these computations, nonaccrual loans are included in the average loan amounts outstanding. Interest on nonaccrual loans is recorded when received as discussed further in Item 8, Note 1 of this report.
3. Interest income on loans includes net loan fees of $\$ 327,000, \$ 91,000$ and $\$ 27,000$ for 2000, 1999 and 1998, respectively.
4. Interest income is presented on a tax-equivalent basis assuming a tax rate of $34 \%$ for 2000, 1999 and 1998. The tax-equivalent adjustment was approximately \$231,000, \$212,000 and \$125,000 for 2000, 1999 and 1998, respectively.
5. For purposes of these computations, yields on investment securities are computed as interest income divided by the average amortized cost of the investments.

## ANALYSIS OF NET INTEREST INCOME CHANGES

The following table presents the changes in interest income and expense between years due to changes in volume and interest rates. That portion of the change in interest attributable to the combined rate/volume variance has been allocated to rate and volume changes in proportion to the absolute dollar amounts of the change in each.

|  | 2000 Over 1999 |  |  | 1999 Over 1998 |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| (Dollars in thousands) | Volume 1 | Rate 1 | Total | Volume 1 |  | Total |

1. The change in interest due to both volume and rate has been allocated proportionately.
2. Average balances include nonaccrual loans.
3. Interest income includes net loan fees.
4. Interest income is presented on a tax-equivalent basis assuming a tax rate of $34 \%$ for 2000, 1999 and 1998.

## ALLOWANCE AND PROVISION FOR LOAN LOSSES

The Company recorded a provision for loan losses of $\$ 750,000$ in 2000 and no provision in 1999 or 1998. The Company increased the provision for loan losses based on the increase in average loans outstanding and the increase in nonperforming assets. Loan charge-offs, net of recoveries, experienced by the Company were \$135,000 in 2000, \$146,000 in 1999 and \$56,000 in 1998. The allowance for loan losses was $\$ 4,897,000$ at December 31, 2000, compared to $\$ 4,282,000$ at December 31, 1999 and $\$ 4,428,000$ at December 31, 1998. The year-end 2000 allowance represents $1.32 \%$ of outstanding loans, compared to $1.54 \%$ at year-end 1999. This decrease relates mainly to the increase in total loans experienced during 2000. From December 31, 1999 to December 31, 2000 the level of nonperforming assets increased $\$ 724,000$ from $\$ 407,000$ to

1. Factors which influence management's determination of the provision for
loan losses charged to expense for each of the years presented above, among other things, include evaluation of each nonperforming and/or classified loan to determine the estimated loss exposure under existing circumstances known to management; evaluation of all potential problem loans identified in light of probable loss exposure based upon existing circumstances known to management, current economic conditions and an overall review of the remainder of the portfolio in light of past loan loss experience.
2. The Company allocated its allowance for loan losses to the various loan categories at December 31, 2000 based on the ratio of total nonperforming loans over the last 5 years. Management views the allowance for loan losses as being available for all potential or presently unidentified loan losses that may occur in the future. The risk of future losses that is inherent in the loan portfolio is not precisely attributable to a particular loan or category of loans. Allocations estimated for the categories do not specifically represent that loan charge-offs of this magnitude will be required. The allocation does not restrict future loan losses attributable to a particular
category of loans from being absorbed by the portion of the allowance attributable to other categories of loans. The risk factors considered when determining the overall level of the allowance are the same when estimating the allocation by major category, as specified in the above summary.

## NONPERFORMING ASSETS

It is the policy of the Company to continually monitor its loan portfolio and to discontinue the accrual of interest on any loan on which payment of principal or interest in a timely manner in the normal course of business is doubtful. Subsequent payments received on such loans are applied to principal if there is any doubt as to the collectibility of such principal; otherwise, these receipts are recorded as interest income. Interest on nonaccrual loans, which would have been recorded under the original terms of the loans, was approximately $\$ 123,000$ for the year ended December 31, 2000. Of this amount, approximately $\$ 19,000$ was actually recorded as interest income on such loans.

At December 31, 2000, after review of potential problem loans identified by management including those noted above, management of the Company concluded the allowance for loan losses was adequate. As of December 31, 2000, approximately $\$ 4,691,000$ of loans not included in the table below were identified by management as having potential credit problems which raised doubts as to the ability of the borrowers to comply with the present loan repayment terms. Of this balance of potential credit problems, $\$ 4,263,000$ were deemed to be impaired. On January 2, 2001, the Bank foreclosed on certain operating assets relating to one borrower in order to protect the Bank's financial interest in that borrower. A loan to this borrower represented $\$ 4,205,000$ of the balance of potential credit problems, not included in the table below, at December 31, 2000. The Bank is currently in the process of stabilizing this business and will continue to operate the business until it can be sold or merged into another entity. As of January 2, 2001 the Bank's investment in this company amounted to $\$ 4,505,000$. All other borrowers identified in this process are currently meeting all of the terms of the applicable loan agreements, however their financial condition has caused management to believe that their loans may result in disclosure at some future time as nonaccrual, past due or restructured.

The Company has no concentrations of loans exceeding $10 \%$ of total loans which are not otherwise disclosed in the loan portfolio composition table. As can be seen in the loan composition table above and discussed in Item 8, Note 4 of this report, the Company's primary market niche for banking services is the privately held commercial company and churches and church-related ministries. Loans to the commercial entities are generally secured by the business assets of the company, including accounts receivable, inventory, machinery and equipment, and the building(s)/plant(s) from which the company operates. Operating lines of credit to these companies generally are secured by accounts receivable and inventory, with specific percentages of each determined on a customer by customer basis, based on the business in which the customer operates. Intermediate term credit for machinery and equipment is generally loaned at some percentage of the value of the equipment purchased, again depending on the type of machinery or equipment purchased by the entity (e.g., less funds would be loaned on restaurant equipment which has a lower resale value than certain types of machinery which tend to hold their value). Long term credits are secured by the entities' building(s)/plant(s) and are generally loaned with a maximum $80 \%$ loan to value ratio.

Loans secured exclusively by real estate to businesses and churches are generally made with a maximum $80 \%$ loan to value ratio, again depending upon the Company's estimate of the resale value and ability for the property to generate cash flow. The Company's loan policy requires an independent appraisal for all loans over $\$ 250,000$ secured by real estate. Company management monitors the local economy in an attempt to determine whether it has had a significant deteriorating effect on such real estate credits. When problems are identified, appraised values are updated on a continual basis, either internally or through ordering an updated external appraisal.

The Company does not have any foreign loans. The Company's loan portfolio does not include a significant amount of single family real estate mortgage or installment credits, as the Company does not market to the consumer side of the banking business.

The Company does not have any other interest-earning assets which would have been included in nonaccrual, past due or restructured loans if such assets were loans.

## NONINTEREST INCOME

The Company's noninterest income is derived mainly from fee revenue relating to the payment and processing of freight and utility invoices. As the Company provides its freight and utility processing and payment services, it is compensated by service fees which are typically calculated on a per-item basis and by the accounts and drafts payable generated in the payment process which can be used to generate interest income. In addition to payment processing revenue, the Company also receives fees from the sale, maintenance, and service bureau operations relating to freight rating software. Other noninterest revenue is generated by the Bank in the form of fees that relate to the credit, depository, and cash management products of the Bank. Bank customers compensate the bank through these fees, the maintenance of demand deposit balances, or both.

Noninterest income in 2000 compared to 1999 include the following significant pre-tax components:

Freight and utility payment and processing revenue decreased \$136,000 or $.7 \%$ to $\$ 18,090,000$. Of the total payment and processing revenue, fees related to utility payment and processing increased \$749,000 and fees relating to freight payment and processing services decreased $\$ 885,000$. The increase in utility payment and processing fees relates the rapid expansion of our customer base. At the end of 2000 the Company was processing 1.8 million utility invoices representing over a billion dollars of invoice value on an annualized basis. The decrease in revenue from freight payment and processing services was due to several factors. First, there was a decrease in non-recurring other miscellaneous freight fees. Second, there were continued anticipated decreases relating to some freight payment services that were part of a prior acquisition. Finally, the balance of compensation relating to the delivery of these services to the existing customer base shifted from service fees to increases in accounts and drafts payable.

Freight rating services revenue decreased $\$ 466,000$ or $25.9 \%$ to $\$ 1,334,000$ due to a change in the strategic direction of the Company from selling rating software to the development of a new Internet-based delivery system of carrier rates. This system will offer the shipping community an expanded level of features, capabilities and ease of access.

Service charges generated by the Bank increased \$238,000 or $20.7 \%$ to $\$ 1,385,000$. This increase was due primarily to the growth of the Bank's customer base.

Other miscellaneous noninterest income increased $\$ 34,000$ or $12.5 \%$ to $\$ 305,000$. This increase was due primarily to miscellaneous services provided by the Company to its customers.

Noninterest income in 1999 compared to 1998 include the following significant pre-tax components:

Freight and utility payment and processing revenue decreased \$583,000 or $3.1 \%$ to $\$ 18,226,000$. Of the total payment and processing revenue, fees related to utility payment and processing increased \$726,000 and fees relating to freight payment and processing services decreased $\$ 1,309,000$. The increase in utility payment and processing fees relates the rapid expansion of our customer base. At the end of 1999 the Company was processing 1.5 million utility invoices representing almost a billion dollars of invoice value
on an annualized basis. The decrease in revenue from freight payment and processing services was due to several factors. First, there was a decrease in the volume of freight transactions due largely to the growth in competition for electronic data interchange (EDI) processing of parcel and air shipments. The entrance in the marketplace of niche companies formed to process the increasing volume of overnight package shipments was caused in part by the increase in e-commerce
transactions. Historically, this has not been a strategic market for the Company. A number of customers, while retained by the Company, moved this type of transaction to these new competitors. The Company has since reengineered its processes to handle these transactions more effectively and it is anticipated that these transactions will provide significant growth in the future. Second, there were continued anticipated decreases relating to some freight payment services that were part of a prior acquisition. Finally, the implementation of new prospects, which typically exceed lost business, appeared to be delayed by our prospect's Y2K remediation programs.

Freight rating services revenue decreased $\$ 346,000$ or $16.1 \%$ due to a change in the strategic direction of the company from selling rating software to the development of a new Internet-based delivery system of carrier rates to the shipping community.

Service charges generated by the Bank increased $\$ 283,000$ or $32.8 \%$ to $\$ 1,147,000$. This increase was due primarily to the growth of the Bank's customer base.

Other variances in total noninterest revenue include the fact that their was a $\$ 285,000$ gain on the sale of securities in 1998 and that other miscellaneous noninterest income decreased $\$ 72,000$ or $21.0 \%$ to \$271, 000 .

## NONINTEREST EXPENSE

Noninterest expense in 2000 compared to 1999 include the following significant pre-tax components:

Salaries and employee benefits increased $\$ 2,526,000$ or $9.7 \%$ to $\$ 28,500,000$. This increase was caused by several factors. First, additional staff was hired in utility payment processing in order to keep pace with the growth in this area. Second, health insurance premiums increased and the Company changed health insurance carriers to provide additional benefits to employees. Third, an increase in profits resulted in an increase in bonus expenses. Finally, annual salary increases accounted for the remainder.

Occupancy expense decreased $\$ 22,000$ or $1.2 \%$ to $\$ 1,758,000$. Equipment expense increased $\$ 313,000$ or $11.5 \%$ to $\$ 3,027,000$. Other noninterest expenses increased $\$ 75,000$ or $1.0 \%$ to $\$ 7,951,000$. The increases can be attributed mainly to expansion of our utility payment processing capabilities, increased investment in our freight payment processing and Internet capabilities and other normal operating expense fluctuations. More details on the components of other noninterest operating expenses are contained in Item 8, Note 8 of this report.

Noninterest expense in 1999 compared to 1998 include the following significant pre-tax components:

Salaries and employee benefits increased \$979,000 or $3.9 \%$ to $\$ 25,974,000$. This increase was caused by several factors. First, additional staff was hired in utility payment processing in order to keep pace with the growth in this area. Second, employee benefits expense increased $15.1 \%$ due to increased pension accruals and health insurance costs. Finally, annual salary increases accounted for the remainder.

Occupancy expense increased $\$ 82,000$ or $4.8 \%$ to $\$ 1,780,000$. Equipment expense increased $\$ 65,000$ or $2.5 \%$ to $\$ 2,714,000$. Other noninterest expenses increased $\$ 593,000$ or $8.1 \%$ to $\$ 7,876,000$. These increases can be attributed mainly to expansion of our utility payment processing capabilities, increased investment in our freight payment processing and Internet capabilities and other normal operating expense fluctuations. More details on the components of other noninterest operating expenses are contained in Item 8, Note 8 of this report.

## INCOME TAX EXPENSE

Income taxes in 2000 totaled $\$ 3,861,000$ compared to $\$ 3,411,000$ in 1999 and $\$ 4,177,000$ in 1998. When measured as a percent of income before income taxes, the Company's effective tax rate was $35.1 \%$ in 2000, $35.5 \%$ in 1999 and 36.1\% in 1998.

## LIQUIDITY

Cash and cash equivalents, which consist of cash and due from banks, federal funds sold, and money market funds, were $\$ 115,931,000$ or $20.1 \%$ of total assets at December 31, 2000. These funds represent the Company's and the Bank's primary source of liquidity to meet future expected and unexpected loan demand, depositor withdrawls or reductions in accounts and drafts payable.

Secondary sources of liquidity include the investment portfolio and borrowing lines. Total investment in debt and equity securities represented approximately $\$ 69,325,000$ or $12.0 \%$ of total assets at December 31, 2000. Of this total, $44 \%$ were U.S. treasury securities, $54 \%$ were U.S. government agencies, and $2 \%$ were other securities. Of the total portfolio, $27 \%$ matures in one year, $62 \%$ matures in one to five years, and 11\% matures in five or more years. Of the total portfolio, $90 \%$ is designated available for sale and $10 \%$ is designated held to maturity. On January 2, 2001 the Company ransferred all remaining held-to-maturity securities to available-for-sale with the adoption of FASB 133. The investment portfolio provides secondary liquidity through regularly scheduled maturities, the ability to sell securities out of the available-for-sale portfolio, and the ability to use these securities in conjunction with its reverse repurchase lines of credit. As of December 31, 2000 the Company had $\$ 19,820,000$ in unsecured federal fund ines of credit and $\$ 60,000,000$ in reverse repurchase agreement lines with unaffiliated financial institutions.

The deposits of the Company's banking subsidiary have historically been stable, consisting of a sizable volume of core deposits related to customers that utilize many other commercial products of the bank. The accounts and drafts payable generated by the Company has also proven to be a stable source of funds.

## INTEREST RATE SENSITIVITY

The Company faces market risk to the extent that its net interest income and its fair market value of equity are affected by changes in market interest rates. The asset/liability management discipline as applied at the Company seeks to limit the volatility, to the extent possible, of both net interest income and the fair market value of equity that can result from changes in market interest rates. This is accomplished by limiting the maturities of fixed rate investments, loans, and deposits; matching fixed rate assets and liabilities to the extent possible; and optimizing the mix of fees and net interest income. However, as discussed below, the Company's asset/liability position differs significantly from most other bank holding companies with positive "gaps" shown for each time horizon presented. This asset sensitive position is caused primarily by the operations of the Company, which generates large balances of accounts and drafts payable. These balances, which are noninterest bearing, contribute to the Company's high net interest margin but causes the Company to become susceptible to changes in interest rates, with a decreasing net interest margin and fair market value of equity in periods of declining interest rates and an increasing net interest margin and fair market value of equity in periods of rising interest rates.

The Company's Asset/Liability Management Committee (ALCO) measures the Company's interest rate risk sensitivity on a quarterly basis to monitor and manage the variability of earnings and fair market value of equity in various interest rate environments. The ALCO evaluates the Company's risk position to determine whether the level of exposure is significant enough to hedge a potential decline in earnings and value or whether the Company can safely increase risk to enhance returns. The ALCO uses gap reports, twelve-month net interest income simulations, and fair market value of equity analyses as its main analytical tools to provide management with insight into the Company's exposure to changing interest rates.

A gap report is used by management to review any significant mismatch between the reproaching points of the Company's rate sensitive assets and liabilities in certain time horizons. A negative gap indicates that more liabilities reprice in that particular time frame and, if rates rise, these liabilities will reprice faster than the assets. A positive gap would indicate the opposite. Management has set policy limits specifying acceptable levels of interest rate risk as measured by the gap report. Gap reports can be misleading in that they capture only the repricing timing within the balance sheet, and fail to capture other significant risks such as basis risk and embedded options risk. Basis risk involves the potential for the spread relationship between rates to change under different rate environments and embedded options risk relates to the potential for the alteration of the level and/or timing of cash flows given changes in rates.

Another measurement tool used by management is net interest income simulation, which forecasts net interest income during the coming twelve months under different interest rate scenarios in order to quantify potential changes in short
term accounting income. Management has set policy limits specifying acceptable levels of interest rate risk given multiple simulated rate movements. These simulations are more informative than gap reports because they are able to capture more of the dynamics within the balance sheet, such as basis risk and embedded options risk. Simulation results illustrate that the Company's net interest income over the next twelve months would decrease 4.3\% from an immediate and sustained parallel decrease in interest rates of 100 basis points and increase $4.2 \%$ from a corresponding increase in interest rates.

While net interest income simulations do a good job of capturing interest rate risk to short term earnings, they do not capture risk within the current balance sheet beyond twelve months. The Company uses fair market value of equity analyses to help identify longer-term risk that may reside on the current balance sheet. The fair market value of equity is represented by the present value of all future income streams generated by the current balance sheet. The Company measures the fair market value of equity as the net present value of all asset and liability cash flows discounted at forward rates suggested by the current Treasury curve plus appropriate credit spreads. This representation of the change in the fair market value of equity under different rate scenarios gives insight into the magnitude of risk to future earnings due to rate changes. Management has set policy limits relating to declines in the market value of equity. The results of these analyses indicate that the Company's fair market value of equity would decrease $4.3 \%$ from an immediate and sustained parallel decrease in interest rates of 100 basis points and increase $3.7 \%$ from a corresponding increase in interest rates.

## INTEREST RATE SENSITIVE POSITION

The following table presents the Company's gap or interest rate risk position at December 31, 2000 for the various time periods indicated.

1 Balances shown reflect earliest repricing date.

## INVESTMENT SECURITIES

Investment portfolio changes from December 31, 1999 to December 31, 2000:
U.S. Government Treasury securities decreased \$12,026,000 or $28.4 \%$ to $\$ 30,247,000$. This decrease was caused by the decision to increase the Company's liquidity given expected loan growth.
U.S. Government corporations and agencies decreased \$2,006,000 or $5.1 \%$ to $\$ 37,263,000$. This decrease was also due to the Company's decision to fund expected loan growth.

Investment portfolio changes from December 31, 1998 to December 31, 1999:
U.S. Government Treasury securities decreased $\$ 16,703,000$ or $28.3 \%$ to $\$ 42,273,000$. This decrease was caused by the decision to allow maturities to exceed reinvestment in this sector in order to improve the yield of the portfolio.
U.S. Government corporations and agencies increased \$15,750,000 or $67.0 \%$ to $\$ 39,269,000$. This increase was funded by maturities of U.S. Government Treasury securities.

There was no single issuer of securities in the investment portfolio at December 31, 2000 other than the U.S. Government and U.S. Government corporations and agencies, for which the aggregate amortized cost exceeded ten percent of total shareholders' equity.

## LOAN PORTFOLIO

Loan portfolio changes from December 31, 1999 to December 31, 2000:
Total loans increased \$93,877,000 or $33.7 \%$ to \$372,220,000. This increase was due mainly to the addition of new lending relationships in the Bank's privately held business banking services group and the expansion of church and church-related loans in the St. Louis metropolitan area and selected areas across the United States. At year-end church and church-related real estate and construction credits totaled \$84,955,000, which represented a $29 \%$ increase over 1999. Additional details regarding the types and maturities of the loan portfolio are contained in the tables below.

Loan portfolio changes from December 31, 1998 to December 31, 1999:
Total loans increased $\$ 53,455,000$ or $23.7 \%$ to $\$ 278,343,000$. This increase was due mainly to the addition of new lending relationships in the Bank's privately held business banking services group and the expansion of church and church-related loans in the St. Louis metropolitan area and selected cities across the United States. At year-end church and church-related credits totaled $\$ 65,956,000$, which represented a $90 \%$ increase over 1998. Additional details regarding the types and maturities of the loan portfolio are contained in the tables below.

LOANS BY MATURITY

| Industrial revenue bonds | 1,725 | 1,454 | -- | 12,625 | - - | 15,804 |
| Installment | 963 | 1,570 | -- | -- | -- | 2,533 |
| Other | 5,399 | -- | -- | -- | -- | 5,399 |
| Total loans | \$77,127 | \$190, 098 | \$4,105 | \$13, 716 | \$87, 174 | \$372, 220 |

1 Loans have been classified as having "floating" interest rates if the rate specified in the loan varies with the prime commercial rate of interest.

## DEPOSITS AND ACCOUNTS AND DRAFTS PAYABLE

Noninterest-bearing demand deposits increased \$8,269,000 or 9.0\% from $\$ 91,672,000$ at December 31, 1999 to $\$ 99,941,000$ at December 31, 2000. The average balance of these accounts increased $\$ 2,579,000$ or $3.3 \%$ from $\$ 77,170,000$ in 1999 to $\$ 79,749,000$ in 2000. New business volume increased throughout 2000 and should continue to increase in 2001.

Interest-bearing deposits increased from \$97,064,000 at December 31, 1999 to $\$ 112,725,000$ at December 31, 2000. The average balances of these deposits, however, decreased $\$ 6,556,000$ or $5.8 \%$ from $\$ 113,491,000$ in 1999 to $\$ 106,935,000$ in 2000. The decrease in average balances related mainly to the movement of funds from deposit accounts to non-deposit investment alternatives.

Accounts and drafts payable generated by the Company in its payment processing operations increased $\$ 52,946,000$ or $21.2 \%$ from $\$ 249,894,000$ at December 31, 1999 to $\$ 302,840,000$ at December 31, 2000. The average balances of these funds increased \$29,956,000 or $12.6 \%$ from $\$ 238,007,000$ in 1999 to $\$ 267,963,000$ in 2000. Due to the Company's payment processing cycle, average balances are much more indicative of the underlying activity than period-end balances since point-in-time comparisons can be misleading if the comparison dates fall on different days of the week. The increase in average balances can be attributed to the fact that the dollar amount of invoices processed increased.

The composition of average deposits and the average rates paid on those deposits is represented in the table entitled "Distribution of Assets, Liabilities and Stockholders' Equity; Interest Rate and Interest Differential" which is included earlier in this discussion. The Company does not have any significant deposits from foreign depositors.

| Three months or less | \$ | 321 |
| :---: | :---: | :---: |
| Three to six months |  | 958 |
| Six to twelve months |  | 331 |
| Over twelve months |  | 434 |
| Total |  | 044 |

## CAPITAL RESOURCES

One of the Company's primary objectives is to maintain a strong capital base to warrant the confidence of our customers, shareholders, and bank regulatory agencies. A strong capital base is needed to take advantage of profitable growth opportunities that arise and to provide assurance to depositors and creditors. The Company and its banking subsidiary continue to significantly exceed all regulatory capital requirements, as evidenced by the following capital ratios at December 31, 2000:

|  | Company Consolidated | Cass <br> Bank |
| :---: | :---: | :---: |
| Total capital (to risk-weighted assets) | 13.55\% | 13.38\% |
| Tier I capital (to risk-weighted assets) | 12.40 | 12.13 |
| Tier I capital (to average assets) | 10.26 | 10.52 |

In 2000, cash dividends declared totaled $\$ 2,784,000$ or $\$ .80$ per share, a $\$ .04$ or $5.3 \%$ increase over the prior year. On December 21, 1999 the Board of Directors authorized a stock repurchase program that allowed the repurchase of up to 200,000 shares of common stock through December 31, 2000. On March 21, 2000 the Board of Directors authorized a 100,000 increase in the number of shares that could be purchased under the program. Along with the 300,000 shares authorized under the plan, the Board of Directors approved the repurchase of an additional 100,180 shares. During 2000 the Company repurchased 394,510 shares. Repurchases were made in the open market or through negotiated transactions from time to time depending on market conditions.

Shareholders' equity was $\$ 53,821,000$ or $9.3 \%$ of total assets at December 31, 2000, a decrease of $\$ 2,742,000$ over the balance at December 31, 1999. This decrease resulted from cash dividends paid of $\$ 2,784,000$, repurchases of stock of $\$ 7,828,000$, which was partially offset by net income of $\$ 7,147,000$, a net unrealized gain on available for sale securities of $\$ 576,000$ and other items of $\$ 147,000$.

Dividends from the bank subsidiary are a significant source of funds for payment of dividends by the Company to its shareholders. The only restrictions on dividends are those dictated by regulatory capital requirements and prudent and sound banking principles. As of December 31, 2000, unappropriated retained earnings of $\$ 424,000$ were available at the Bank for the declaration of dividends to the Company without prior approval from regulatory authorities.

## SUBSEQUENT EVENTS

On January 18, 2001 the Company announced that it acquired the business and substantially all the assets of "The Utility Navigator(R)" a division of privately held Insite Services, Inc. These assets include all books and records relating to the business, customer and vendor lists, customer contracts, reporting history and databases, marketing and advertising materials, trademarks and other intellectual property, and a license to the software used to process and pay utility bills. This move should solidify the market position of the Company in this emerging market.

## EFFECT OF RECENT AND PROSPECTIVE ACCOUNTING PRONOUNCEMENTS

In June 1998, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standards No. 133, Accounting for Derivative Instruments and Hedging Activities (SFAS 133) which establishes standards for derivative instruments, including certain derivative instruments embedded in other contracts, and for hedging activities. It requires an entity to recognize all derivatives as either assets or liabilities in the statement of financial position and measure those instruments at fair value. In June 1999, the FASB issued Statement of Financial Accounting Standards No. 137, Accounting for Derivative Instruments and Hedging Activities - Deferral of the Effective Date of FASB No. 133, which defers the effective date of SFAS 133 from fiscal years beginning after June 15, 1999 to fiscal years beginning after June 15, 2000. Earlier application of SFAS 133, as amended, is encouraged but should not be applied retroactively to financial statements of prior periods. In June 2000, the

Statement of Financial Accounting Financial Standards No. 138, Accounting for Certain Derivative Instruments and Certain Hedging Activities, which addresses certain issues causing implementation difficulties. The Company has adopted SFAS 133, as amended, effective January 1, 2001, but since the Company does not participate in any derivative or hedging activities, SFAS 133, as amended, had no impact on the Company's consolidated financial position and results of operations, except for the transfer of all held-to-maturity securities into available-for-sale as of January 1, 2001.

## INFLATION

Inflation can impact the financial position and results of the operations of banks and bank holding companies because these companies hold monetary assets and monetary liabilities. Monetary assets and liabilities are those which can be converted into a fixed number of dollars, and include cash, investments, loans and deposits. The Company's consolidated balance sheets reflects a net positive monetary position (monetary assets exceeding monetary liabilities). During periods of inflation, the holding of a net positive monetary position will result in an overall decline in the purchasing power of a company.

FORWARD-LOOKING STATEMENTS - FACTORS THAT MAY AFFECT FUTURE RESULTS
Statements in Management's Discussion and Analysis of Financial Condition and Results of Operations and the other sections of this Report that are not statements of historical fact are forward-looking statements. Such statements are subject to important risks and uncertainties which could cause the Company's actual results to differ materially from those expressed in any such forward-looking statements made herein. The aforesaid uncertainties include, but are not limited to: burdens imposed by federal and state regulators, credit risk related to borrowers' ability to repay loans, concentration of loans in the St. Louis Metropolitan area which subjects the Company to risks associated with changes in the local economy, risks associated with fluctuations in interest rates, competition from other banks and other financial institutions, some of which are not as heavily regulated as the Company and risks associated with breakdowns in data processing systems and competition from other providers of similar services.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

For information regarding the market risk of the Company's financial
instruments, see Part II, Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations". The Company's primary market risk exposure is to interest rate risk.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2000 and 1999
NOTE 1
SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES
The Company provides information services which include processing and payment of freight and utility charges, preparation of transportation management reports, auditing of freight charges and rating of freight shipments. The Company is subject to competition from other commercial concerns providing similar services to companies throughout the United States and Canada. The consolidated balance sheet caption "Accounts and Drafts Payable," consists of obligations related to bill payment services which are performed for customers.

The Company also provides a full range of banking services to individual, corporate and institutional customers through its wholly owned subsidiary bank. The Bank is subject to competition from other financial and nonfinancial institutions throughout the metropolitan St. Louis, Missouri area. Additionally, the Company and the Bank are subject to the regulations of certain federal and state agencies and undergo periodic examinations by those regulatory agencies.

On January 9, 2001 the Company's subsidiary, Cass Information Systems, Inc. was merged into the parent company, Cass Commercial Corporation, and the parent's name was subsequently changed to Cass Information Systems, Inc.

The accounting and reporting policies of the Company and its subsidiaries conform to accounting policies generally accepted in the United States of America. The following is a description of the more significant of those policies.

BASIS OF PRESENTATION The consolidated financial statements include the accounts of the Company and its wholly owned subsidiaries after elimination of intercompany transactions.

In preparing the consolidated financial statements, Company management is required to make estimates and assumptions which significantly affect the reported amounts in the consolidated financial statements. A significant estimate which is particularly susceptible to change in a short period of time is the determination of the allowance for loan losses.

INVESTMENT IN DEBT AND EQUITY SECURITIES At the time of purchase, debt securities are classified into one of two categories: available-for-sale or held-to-maturity. Held-to-maturity securities are those securities which the Company has the ability and intent to hold until maturity. All equity securities, and debt securities not classified as held-to-maturity, are classified as available-for-sale.

Available-for-sale securities are recorded at fair value. Held-to-maturity securities are recorded at amortized cost, adjusted for the amortization of premiums or discounts. Unrealized gains and losses, net of the related tax effect, on available-for-sale securities are excluded from earnings and reported as accumulated other comprehensive income. Gains and losses on the sale of available-for-sale securities are determined using the specific identification method.

A decline in the fair value of any available-for-sale or held-to-maturity security below cost that is deemed other than temporary is charged to earnings and results in the establishment of a new cost basis for the security.

The Bank is required to maintain an investment in the capital stock of the Federal Reserve Bank. The stock is recorded at cost, which represents redemption value. The Bank has elected to become a member of the Federal Home Loan Bank and invested in its common stock which is recorded at cost, which represents redemption value.

INTEREST ON LOANS Interest on loans is recognized based upon the principal amounts outstanding. It is the Company's policy to discontinue the accrual of interest when there is reasonable doubt as to the collectibility of principal or interest. Subsequent payments received on such loans are applied to principal if there is any doubt as to the collectibility of such principal; otherwise, these receipts are recorded as interest income. The accrual of interest on a loan is resumed when the loan is current as to payment of both principal and interest and/or the borrower demonstrates the ability to pay and remain current.

ALLOWANCE FOR LOAN LOSSES The allowance for loan losses is increased by provisions charged to expense and reduced by net charge-offs. The provisions charged to expense are based on economic conditions, past losses, collection experience, risk characteristics of the portfolio and such other factors which, in management's judgment, deserve current recognition.

Management believes the allowance for loan losses is adequate to absorb losses in the loan portfolio. While management uses all available information to recognize losses on loans, future additions to the allowance may be necessary based on changes in economic conditions. Additionally, various regulatory agencies, as an integral part of their examination process, periodically review the Company's allowance for loan losses. Such agencies may require the Company to increase the allowance for loan losses based on their judgments and interpretations about information available to them at the time of their examination.

INFORMATION SERVICES REVENUE Revenue from freight and utility related services is recognized when fees are billed to customers, generally monthly.

PREMISES AND EQUIPMENT Premises and equipment are stated at cost less accumulated depreciation and amortization. Depreciation is computed over the estimated useful lives of the assets, or the respective lease terms for leasehold improvements, using straight-line and accelerated methods. Estimated useful lives are $31-1 / 2$ to 39 years for buildings, 8 to 10 years for leasehold improvements and 3 to 10 years for furniture, fixtures, equipment and software. Maintenance and repairs are charged to expense as incurred.

INTANGIBLE ASSETS Cost in excess of fair value of net assets acquired and fair value in excess of cost of net assets acquired have resulted from business acquisitions which were accounted for using the purchase method. The premiums and discounts related to the fair value adjustments are amortized using the level-yield method.

Cost in excess of fair value of net assets acquired and fair value in excess of cost of net assets acquired are amortized on a straight-line basis over 3 to 15 years.

Periodically, the Company reviews its intangible assets for events or changes in circumstances that may indicate that the carrying amount of the assets may not be recoverable. Based on those reviews, adjustments of recorded amounts have not been required.

INCOME TAXES Deferred tax assets and liabilities are recognized for the estimated future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates in effect for the year in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date.

CASH FLOWS For purposes of the consolidated statements of cash flows, the Company considers due from banks, federal funds sold and other short-term investments to be cash equivalents.

RECLASSIFICATIONS Certain amounts in the 1999 and 1998 consolidated financial statements have been reclassified to conform with the 2000 presentation. Such reclassifications have no effect on previously reported net income.

## NOTE 2

CAPITAL REQUIREMENTS AND REGULATORY RESTRICTIONS
The Company and the Bank are subject to various regulatory capital requirements administered by the federal banking agencies. Failure to meet minimum capital requirements can result in certain mandatory, and possibly additional discretionary, actions by regulators that, if undertaken, could have a direct material effect on the Company's consolidated financial statements. Under capital adequacy guidelines, the Company and the Bank must meet specific capital guidelines that involve quantitative measures of assets, liabilities and certain off-balance-sheet items as calculated under regulatory accounting practices. The Company and the Bank's capital amounts and classifications are also subject to qualitative judgments by the regulators about components, risk weightings and other factors.

Quantitative measures established by regulators to ensure capital adequacy require the Company and the Bank to maintain minimum amounts and ratios of total and Tier I capital to risk-weighted assets, and of Tier I capital to average assets. Management believes as of December 31, 2000, the Company and the Bank meet all capital adequacy requirements to which they are subject.

The Bank is also subject to the regulatory framework for prompt corrective action. The most recent notification from the regulatory agencies, dated December 15, 2000, categorized the Bank as well capitalized. To be categorized as well capitalized, the Bank must maintain minimum total risk-based, Tier I risk-based, and Tier I leverage ratios as set
forth in the table below. There are no conditions or events since that notification that management believes have changed the Bank's category.

Subsidiary dividends are a principal source of funds for payment of dividends by the Company to its shareholders. The Bank is subject to regulations which require the maintenance of minimum capital levels. At December 31, 2000, unappropriated retained earnings of $\$ 424,000$ were available at the Bank for the declaration of dividends to the Company without prior approval from regulatory authorities.

Restricted funds on deposit used to meet regulatory reserve requirements amounted to approximately $\$ 2,053,000$ and $\$ 4,522,000$ at December 31, 2000 and 1999, respectively.

The Company and the Bank's actual and required capital amounts and ratios as of December 31, 2000 and 1999 are as follows:

|  | Actual |  | Capital requirements |  | Requirement to be well capitalized under prompt corrective action provisions |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| (Dollars in Thousands) | Amount | Ratio | Amount | Ratio | Amount | Ratio |

NOTE 3
INVESTMENT IN DEBT AND EQUITY SECURITIES
Debt and equity securities have been classified in the consolidated balance sheets according to management's intent.

The amortized cost and fair values of debt securities classified as held-tomaturity at December 31, 2000 and 1999, are as follows:

|  | 2000 |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
| (In Thousands) | Amortized Cost | Gross Unrealized Gains | Gross Unrealized Losses | Fair Value |
| U.S. Government Treasury securities | \$2,004 | \$- | \$-- | \$2,004 |
| Obligations of U.S. Government corporations and agencies | 3,465 | 13 | (3) | 3,475 |
| States and political subdivisions | 1,181 | 28 | (6) | 1,203 |
| Total | \$6,650 | \$41 | \$(9) | \$6,682 |

|  | 1999 |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
| (In Thousands) | Amortized Cost | Gross Unrealized Gains | Gross Unrealized Losses | Fair Value |
| U.S. Government Treasury securities | \$14,146 | \$15 | \$ (7) | \$14,154 |
| Obligations of U.S. Government corporations and agencies | 10,155 | - - | (186) | 9,969 |
| States and political subdivisions | 1,253 | 19 | (14) | 1,258 |
| Total | \$25,554 | \$34 | \$(207) | \$25,381 |

The amortized cost and fair value of debt securities classified as held-to-maturity at December 31, 2000, by contractual maturity, are as follows. Expected maturities may differ from contractual maturities because borrowers have the right to prepay obligations with or without prepayment penalties.

|  | 2000 |  |
| :---: | :---: | :---: |
| (In Thousands) | Amortized Cost | Fair <br> Value |
| Due in 1 year or less | \$2,697 | \$2,695 |
| Due after 1 year through 5 years | 524 | 527 |
| Due after 5 years through 10 years | 3,429 | 3,460 |
| Total | \$6,650 | \$6,682 |

The amortized cost and fair values of debt and equity securities classified as available-for-sale at December 31, 2000 and 1999, are summarized as follows:

|  | 2000 |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
| (In Thousands) | Amortized Cost | Gross Unrealized Gains | Gross Unrealized Losses | Fair Value |
| U.S. Government Treasury securities | \$27,975 | \$268 | \$ | \$28,243 |
| Obligations of U.S. Government corporations and agencies | 33,825 | 95 | (122) | 33,798 |
| Total debt securities | 61,800 | 363 | (122) | 62,041 |
| Stock in Federal Reserve Bank and Federal Home Loan Bank | 634 | -- | ) | 634 |
| Total | \$62,434 | \$363 | \$(122) | \$62,675 |

(In Thousands)

The amortized cost and fair value of debt and equity securities classified as available-for-sale at December 31, 2000, by contractual maturity, are shown in the following table. Expected maturities may differ from contractual maturities because borrowers have the right to prepay obligations with or without prepayment penalties.

|  | 2000 |  |
| :---: | :---: | :---: |
| (In Thousands) | Amortized Cost | Fair <br> Value |
| Due in 1 year or less | \$16, 098 | \$16,142 |
| Due after 1 year through 5 years | 42,503 | 42,727 |
| Due after 5 years through 10 years | 525 | 512 |
| Due after 10 years | 2,674 | 2,660 |
| No stated maturity | 634 | 634 |
| Total | \$62,434 | \$62,675 |

The amortized cost of debt securities pledged to secure public deposits, securities sold under agreements to repurchase and for other purposes was approximately $\$ 5,596,000$ and $\$ 55,899,000$ at December 31, 2000 and 1999, respectively.

There were no sales of debt and equity securities classified as available-for-sale in 2000 or 1999. In 1998, proceeds from the sale of debt securities classified as available-for-sale were $\$ 6,409,000$ with a realized gross gain on the sale of $\$ 285,000$.

NOTE 4
LOANS
A summary of loan categories at December 31, 2000 and 1999, is as follows:

| (In Thousands) | 2000 | 1999 |
| :---: | :---: | :---: |
| Commercial and industrial | \$136,482 | \$106, 444 |
| Real estate: |  |  |
| Mortgage | 117,170 | 86,171 |
| Mortgage - Church \& Related | 65,368 | 43,311 |
| Construction | 9,877 | 6,987 |
| Construction - Church \& Related | 19,587 | 22,646 |
| Industrial revenue bonds | 15,804 | 7,265 |
| Installment | 2,533 | 1,541 |
| Other | 5,399 | 3,978 |
| Total | \$372, 220 | \$278, 343 |

The Company originates commercial, industrial, real estate and installment loans to businesses, churches and consumers throughout the metropolitan St. Louis area. The Company also originates church and church-related loans outside the metropolitan St. Louis area. The Company does not have any particular concentration of credit in any one economic sector; however, a substantial portion of the commercial and industrial loans are extended to privately held commercial companies in this market area, and are generally secured by the assets of the business. The Company also has a substantial portion of real estate loans that are extended to churches, in this market area and selected cities throughout the United States, which are secured by mortgages.

Loan transactions involving executive officers and directors of the Company and its subsidiaries and loans to affiliates of executive officers and directors for the year ended December 31, 2000, are summarized below. Such loans were made in the normal course of business on substantially the same terms, including interest rates and collateral, as those prevailing at the same time for comparable transactions with other persons, and did not involve more than the normal risk of collectibility.
(In Thousands)

| Aggregate balance, January 1, 2000 | $\$ 1,230$ |
| :--- | ---: |
| New loans | -- |
| Payments | 1,177 |

Aggregate balance, December 31, 2000 \$ 53
====================================================================1

A summary of the activity in the allowance for loan losses for 2000, 1999 and 1998 is as follows:

| (In Thousands) | 2000 | 1999 | 1998 |
| :---: | :---: | :---: | :---: |
| Balance, January 1 | \$4,282 | \$4,428 | \$4,484 |
| Provision charged to expense | 750 | -- | -- |
| Loans charged off | (183) | (256) | (365) |
| Recoveries of loans previously charged off | 48 | 110 | 309 |
| Net loan charge-offs | (135) | (146) | (56) |
| Balance, December 31 | \$4, 897 | \$4,282 | \$4,428 |

A summary of impaired loans at December 31, 2000 and 1999, is as follows:

| (In Thousands) | 2000 | 1999 |
| :---: | :---: | :---: |
| Nonaccrual loans | \$1,127 | \$170 |
| Impaired loans continuing to accrue interest | 4,267 | 173 |
| Total impaired loans | \$5,394 | \$343 |

The allowance for loan losses on impaired loans was \$271,000 and \$175,000 at December 31, 2000 and 1999, respectively. Impaired loans with no related allowance for loan losses totaled \$5,123,000 and \$168,000 at December 31, 2000 and 1999, respectively. The average balance of impaired loans during 2000 and 1999 was \$1,476,000 and \$517,000, respectively. Subsequent to year-end the Bank foreclosed on certain operating assets of one borrower that represented \$4,205,000 of the impaired loan balance at December 31, 2000. The Bank is currently in the process of stabilizing this business and will continue to operate the business until it can be sold or merged into another entity.

A summary of interest income on impaired loans for 2000, 1999 and 1998 is as follows:

|  | 2000 |  |  |
| :---: | :---: | :---: | :---: |
| (In Thousands) | Nonaccrual Loans | Impaired Loans Continuing to Accrue interest | Total |
| Income recognized | \$ 19 | \$87 | \$106 |
| Interest income if interest had accrued | 123 | 87 | 210 |
|  |  | 1999 |  |
| (In Thousands) | Nonaccrual Loans | Impaired Loans Continuing to Accrue interest | Total |
| Income recognized | \$ 1 | \$1 | \$ 2 |
| Interest income if interest had accrued | 44 | 1 | 45 |
|  |  | 1998 |  |
| (In Thousands) | Nonaccrual Loans | Impaired loans Continuing to Accrue interest | Total |
| Income recognized | \$17 | \$26 | \$ 43 |
| Interest income if interest had accrued | 78 | 26 | 104 |

NOTE 5
PREMISES AND EQUIPMENT
A summary of premises and equipment at December 31, 2000 and 1999, is as follows:

| (In Thousands) | 2000 | 1999 |
| :---: | :---: | :---: |
| Land | \$ 873 | \$ 367 |
| Buildings | 9,101 | 6,341 |
| Leasehold improvements | 1,264 | 1,264 |
| Furniture, fixtures and equipment | 22,963 | 19,392 |
|  | 34,201 | 27,364 |
| Less accumulated depreciation and amortization | 20,287 | 18,183 |
| Total | \$13,914 | \$ 9,181 |

Depreciation charged to expense in 2000, 1999 and 1998 amounted to $\$ 2,275,000$, \$1,993, 000 and $\$ 1,953,000$, respectively.

The Company and its subsidiaries lease various premises and equipment under operating lease agreements which expire at various dates through 2007. The following is a schedule, by year, of future minimum rental payments required under operating leases that have initial or remaining noncancelable lease terms in excess of one year as of December 31, 2000:
(In Thousands)

| 2001 | \$ 318 |
| :---: | :---: |
| 2002 | 243 |
| 2003 | 242 |
| 2004 | 242 |
| 2005 | 209 |
| 2006 and thereafter | 49 |
| Total | \$1,303 |

Rental expense for 2000, 1999 and 1998 was $\$ 1,161,000, \$ 1,271,000$ and \$1,161,000, respectively.

NOTE 6
INTEREST-BEARING DEPOSITS
Interest-bearing deposits consist of the following at December 31, 2000 and 1999:

| (In Thousands) | 2000 | 1999 |
| :---: | :---: | :---: |
| NOW and Money Market Demand Accounts | \$ 49, 212 | \$43, 092 |
| Savings deposits | 56,441 | 47,498 |
| Time deposits: |  |  |
| Less than \$100 | 4,028 | 3,863 |
| \$100 or more | 3,044 | 2,611 |
| Total | \$112,725 | \$97, 064 |

Interest on deposits consists of the following for 2000, 1999 and 1998:

| (In Thousands) | 2000 | 1999 | 1998 |
| :---: | :---: | :---: | :---: |
| NOW and Money Market Demand Accounts | \$1,961 | \$1,431 | \$1,198 |
| Savings deposits | 2,885 | 2,539 | 2,624 |
| Time deposits: |  |  |  |
| Less than \$100 | 190 | 207 | 227 |
| \$100 or more | 129 | 180 | 222 |
| Total | \$5,165 | \$4,357 | \$4,271 |

The scheduled maturities of certificates of deposit at December 31, 2000 and 1999, are summarized as follows:

|  | 2000 |  | 1999 |  |
| :---: | :---: | :---: | :---: | :---: |
| (In Thousands) | Amount | Percent of Total | Amount | Percent of Total |
| Due within: |  |  |  |  |
| One year | \$5,871 | 83.0\% | \$5, 014 | 77.4\% |
| Two years | 1,037 | 14.7 | 938 | 14.5 |
| Three years | 34 | . 5 | 382 | 5.9 |
| Four years | 91 | 1.3 | -- | -- |
| Five years | 39 | . 5 | 140 | 2.2 |
| Total | \$7, 072 | 100.0\% | \$6,474 | 100.0\% |

NOTE 7
EMPLOYEE BENEFITS
The Company has a noncontributory defined benefit pension plan which covers substantially all of its employees. The Company's subsidiaries accrue and make contributions designed to fund normal service costs on a current basis using the projected unit credit with service proration method to amortize prior service costs arising from improvements in pension benefits and qualifying service prior to the establishment of the plan over a period of approximately 30 years.

The pension cost for 2000, 1999 and 1998 was $\$ 386,000, \$ 784,000$ and $\$ 517,000$, respectively, and included the following components:

| (In Thousands) | 2000 | 1999 | 1998 |
| :---: | :---: | :---: | :---: |
| Service cost - benefits earned during the year | \$ 747 | \$ 929 | \$ 763 |
| Interest cost on projected benefit obligations | 778 | 747 | 617 |
| Expected return on plan assets | (959) | (899) | (765) |
| Net amortization and deferral | (180) | 7 | (98) |
| Net periodic pension cost | \$ 386 | \$ 784 | \$ 517 |

A summary of the activity in the defined benefit pension plan's benefit
obligation, assets, funded status and amounts recognized in the Company's consolidated balance sheets at December 31, 2000 and 1999, is as follows:

| (In Thousands) | 2000 | 1999 |
| :---: | :---: | :---: |
| Benefit obligation: |  |  |
| Balance, January 1 | \$10,562 | \$10,771 |
| Service cost | 747 | 929 |
| Interest cost | 778 | 747 |
| Actuarial loss (gain) | 41 | $(1,733)$ |
| Benefits paid | (197) | (152) |
| Balance, December 31 | \$11,931 | \$10,562 |
| Plan assets: |  |  |
| Fair value, January 1 | \$11,958 | \$10,886 |
| Actual return | 304 | 1,017 |
| Employer contribution | 24 | 207 |
| Benefits paid | (197) | (152) |
| Fair value, December 31 | \$12,089 | \$11,958 |
| Funded status: |  |  |
| Unfunded projected benefits obligation | \$ 158 | \$ 1,396 |
| Unrecognized prior service cost | 19 | 134 |
| Unrecognized net gains | $(2,251)$ | $(3,241)$ |
| Accrued pension cost | \$ 2,074 ) | \$(1,711) |

The weighted average discount rate and the rate of increase in future compensation levels used in determining the actuarial present value of the projected benefit obligation were $7.50 \%$ and $4.00 \%$ in $2000,7.75 \%$ and $4.00 \%$ in 1999 and $6.75 \%$ and $4.00 \%$ in 1998. The expected long-term rate of return on assets was $8.00 \%$ in 2000, 1999 and 1998.

In addition to the above funded benefit plan, in 1998 the Company developed an unfunded supplemental executive retirement plan which covers key executives of the Company. This is a noncontributory plan in which the Company's subsidiaries make accruals designed to fund normal service costs on a current basis using the same method and criteria as its defined benefit plan.

The pension cost for 2000, 1999 and 1998 for the supplemental executive retirement plan was $\$ 245,000, \$ 257,000$ and $\$ 143,000$ respectively, and included the following components:

| (In Thousands) | 2000 | 1999 | 1998 |
| :---: | :---: | :---: | :---: |
| Service cost - benefits earned during the year | \$ 29 | \$ 38 | \$ 25 |
| Interest cost on projected benefit obligations | 131 | 113 | 59 |
| Net amortization and deferral | 85 | 106 | 59 |
| Net periodic pension cost | \$245 | \$257 | \$143 |

A summary of the activity in the supplemental executive retirement plan's benefit obligation, funded status and amounts recognized in the Company's consolidated balance sheets at December 31, 2000 and 1999, is as follows:

| (In Thousands) | 2000 | 1999 |  |
| :---: | :---: | :---: | :---: |
| Benefit obligation: |  |  |  |
| Balance, January 1 | \$ 1,566 | \$ | 972 |
| Service cost | 30 |  | 38 |
| Interest cost | 131 |  | 113 |
| Actuarial loss | 71 |  | 443 |
| Balance, December 31 | \$ 1,798 |  | 1,566 |
| Funded status: |  |  |  |
| Unfunded projected benefits obligation | \$(1,798) |  | 1,566) |
| Unrecognized prior service cost | 645 |  | 704 |
| Unrecognized actuarial loss | 508 |  | 462 |
| Accrued pension cost | (645) |  | (400) |
| Minimum liability adjustment | (533) |  | (581) |
| Accrued pension cost | \$(1,178) | \$ | (981) |

The weighted average discount rate and the rate of increase in future compensation levels used in determining the actuarial present value of the projected benefit obligation were $7.50 \%$ and $4.00 \%$ in $2000,7.75 \%$ and $4.00 \%$ in 1999 and $6.75 \%$ and $5.00 \%$ in 1998.

The Company maintains a noncontributory profit sharing plan which covers substantially all of its employees. Employer contributions are calculated based upon formulas which relate to current operating results and other factors. Profit sharing expense recognized in the consolidated statements of income in 2000, 1999 and 1998 was \$1,617,000, \$1,413,000 and \$1,679,000, respectively.

The Company sponsors a defined contribution 401(k) plan to provide additional retirement benefits to substantially all employees. Contributions under the 401(k) plan for 2000, 1999 and 1998 were $\$ 247,000$, $\$ 234,000$ and $\$ 199,000$, respectively.

The Company maintains a restricted stock bonus plan which provides for the issuance of up to 100,000 shares of the Company's common stock. The fair value of such shares, which is based on the market price on the date of grant, has been recorded in the consolidated financial statements through the establishment of a contra shareholders' equity account which is amortized over the three-year vesting period. Amortization of the restricted stock bonus awards totaled \$81,000, \$68,000 and \$50,000 for 2000, 1999 and 1998, respectively.

Changes in stock bonus shares outstanding were as follows:

|  | Weighted Average <br> Fair Value |
| :--- | :---: | :---: |
| Per Share |  |

The Company also maintains a performance-based stock option plan which provides for the granting of options to acquire up to 400,000 shares of Company common stock. Options vest over a period not to exceed seven years, but the vesting period can be less based on the Company's attainment of certain financial operating performance criteria.

The following table summarizes stock options outstanding as of December 31, 2000:

| Exercise | Options | Weighted Average <br> Remaining |
| :---: | :---: | :---: |
| Price | Outstanding | Contractual Life |

Changes in options outstanding were as follows:

|  | Shares | Weighted Average Exercise Price |
| :---: | :---: | :---: |
| Balance at December 31, 1997 | 118,500 | \$11.91 |
| Exercised | $(7,200)$ | 10.32 |
| Forfeited | $(1,400)$ | 10.32 |
| Balance at December 31, 1998 | 109,900 | 12.04 |
| Granted | 67,100 | 25.11 |
| Exercised | $(9,960)$ | 10.32 |
| Forfeited | (250) | 10.32 |
| Balance at December 31, 1999 | 166,790 | 17.38 |
| Exercised | $(5,370)$ | 10.32 |
| Balance at December 31, 2000 | 161,420 | 17.61 |

At December 31, 2000, 57,337 shares were exercisable with a weighted average exercise price of $\$ 11.11$.

The Company accounts for stock-based compensation under the stock option plan in accordance with Accounting Principles Board Opinion No. 25, "Accounting for Stock Issued to Employees" (APB 25), and accordingly, recognizes no compensation expense as the exercise price of the Company's employee stock options equals the market price of the underlying stock on the date of grant. The Company elected not to adopt the recognition provisions of the Financial Accounting Standards Board Statement of Financial Accounting Standards No. 123, "Accounting for Stock-Based Compensation" (SFAS 123). An entity that continues to apply APB 25 shall disclose certain pro forma information as if the fair value-based accounting method in SFAS 123 had been used to account for stock-based compensation costs. The required disclosure provisions of SFAS 123 are provided in the table below. The Company uses the Black-Scholes option pricing model to determine the fair value of the stock options at the date of grant using the related assumptions as presented in the following table:

| (In Thousands of Dollars Except Share and per Share Data) | 2000 | 1999 | 1998 |
| :---: | :---: | :---: | :---: |
| Net earnings as reported | \$7,147 | \$6,198 | \$7,408 |
| Pro forma net earnings | 7,076 | 6,133 | 7,347 |
| Diluted earnings per share as reported | 2.02 | 1.61 | 1.89 |
| Pro forma diluted earnings per share | 2.00 | 1.59 | 1.87 |
| Weighted average assumptions: |  |  |  |
| Expected lives in years | 7 | 7 | 7 |
| Dividend yield | 2.66\% | 2.64\% | 2.62\% |
| Expected volatility | 7.68\% | 7.63\% | 7.25\% |
| Risk-free interest rate | 6.30\% | 6.31\% | 6.38\% |

NOTE 8
OTHER NONINTEREST EXPENSE
Details of other noninterest expense for 2000, 1999 and 1998 are as follows:

| (In Thousands) | 2000 | 1999 | 1998 |
| :---: | :---: | :---: | :---: |
| Postage, printing and supplies | \$2,375 | \$2,261 | \$2,161 |
| Advertising and business development | 1,407 | 1,509 | 1,392 |
| Professional fees | 1,223 | 1,064 | 1,056 |
| Outside service fees | 792 | 796 | 431 |
| Data processing services | 499 | 570 | 590 |
| Telecommunications | 635 | 612 | 531 |
| Other | 1,020 | 1,064 | 1,122 |
| Total other noninterest expense | \$7,951 | \$7,876 | \$7,283 |

NOTE 9
INCOME TAXES
The components of income tax expense for 2000, 1999 and 1998 are as follows:

| (In Thousands) | 2000 | 1999 | 1998 |
| :---: | :---: | :---: | :---: |
| Current: |  |  |  |
| Federal | \$4, 035 | \$3,560 | \$3,654 |
| State | 327 | 343 | 392 |
| Deferred | (501) | (492) | 131 |
| Total income tax expense | \$3,861 | \$3,411 | \$4,177 |

A reconciliation of expected income tax expense, computed by applying the effective federal statutory rate of $34 \%$ for 2000, 1999 and 1998 to income before income tax expense, to reported income tax expense is as follows:

| (In Thousands) | 2000 | 1999 | 1998 |
| :---: | :---: | :---: | :---: |
| Expected income tax expense | \$3,743 | \$3,267 | \$3,939 |
| (Reductions) increases resulting from: |  |  |  |
| Tax-exempt interest | (150) | (136) | (79) |
| State taxes, net of federal benefit | 216 | 226 | 259 |
| Other, net | 52 | 54 | 58 |
| Total income tax expense | \$3, 861 | \$3,411 | \$4, 177 |

The tax effects of temporary differences which give rise to significant portions of the deferred tax assets and deferred tax liabilities at December 31, 2000 and 1999, are presented below:

| (In Thousands) | 2000 | 1999 |
| :---: | :---: | :---: |
| Deferred tax assets: |  |  |
| Unrealized loss on investment in debt and equity securities available for sale | \$ -- | \$ 215 |
| Allowance for loan losses | 1,180 | 898 |
| Accrued pension cost | 716 | 590 |
| Premises and equipment | 59 | 39 |
| Other | 388 | 292 |
| Total deferred tax assets | 2,343 | 2,034 |
| Deferred tax liabilities: |  |  |
| Unrealized gain on investment in debt and equity securities available for sale | (82) | -- |
| Discount accretion | (48) | (57) |
| Other | (175) | (143) |
| Total deferred tax liabilities | (305) | (200) |
| Net deferred tax assets | \$2, 038 | \$1,834 |

A valuation allowance would be provided on deferred tax assets when it is more likely than not that some portion of the assets will not be realized. The Company has not established a valuation allowance at December 31, 2000 or 1999, due to management's belief that all criteria for recognition have been met, including the existence of a history of taxes paid sufficient to support the realization of deferred tax assets.

NOTE 10
CONTINGENCIES
The Company and its subsidiaries are involved in various pending legal actions and proceedings in which claims for damages are asserted. Management, after discussion with legal counsel, believes the ultimate resolution of these legal actions and proceedings will not have a material effect upon the Company's consolidated financial position or results of operations.

NOTE 11
DISCLOSURES ABOUT FINANCIAL INSTRUMENTS
The Company is party to financial instruments with off-balance-sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to extend credit, commercial letters of credit and standby letters of credit. The Company's exposure to credit loss in the event of nonperformance by the other party to the financial instrument for commitments to extend credit, commercial letters of credit and standby letters of credit is represented by the contractual amounts of those instruments.

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commercial and standby letters of credit are conditional commitments issued by the Company to guarantee the performance of a customer to a third party. These off-balance-sheet financial instruments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since some of the financial instruments may expire without being drawn upon, the total amounts do not necessarily represent future cash requirements. Commitments to extend credit and letters of credit are subject to the same underwriting standards as those financial instruments included on the consolidated balance sheets. The Company evaluates each customer's credit-worthiness on a case-by-case basis. The amount of collateral obtained, if deemed necessary upon extension of the credit, is based on management's credit evaluation of the borrower. Collateral held varies, but is generally accounts receivable, inventory, residential or income-producing commercial property or equipment.

Conditional commitments to extend credit, commercial letters of credit and standby letters of credit totaled approximately $\$ 16,958,000, \$ 22,000$ and $\$ 3,542,000$, respectively, at December 31, 2000 and approximately $\$ 24,438,000$, \$99,000 and \$4,756,000, respectively at December 31, 1999.

Following is a summary of the carrying amounts and fair values of the Company's financial instruments at December 31, 2000 and 1999:

|  | 2000 |  | 1999 |  |
| :---: | :---: | :---: | :---: | :---: |
| (In Thousands) | Carrying Amount | Fair Value | Carrying Amount | Fair Value |
| Balance sheet assets: |  |  |  |  |
| Cash and cash equivalents | \$115,931 | \$115, 931 | \$124, 217 | \$124,217 |
| Investment in debt and equity securities | 69,325 | 69,357 | 82,996 | 82,823 |
| Loans, net | 367,323 | 365,398 | 274,061 | 270,712 |
| Accrued interest receivable | 3,528 | 3,528 | 2,764 | 2,764 |
| Total | \$556,107 | \$554, 228 | \$484, 038 | \$480, 516 |
| Balance sheet liabilities: |  |  |  |  |
| Deposits | \$212,666 | \$212, 666 | \$188,736 | \$189, 052 |
| Accounts and drafts payable | 302,840 | 302,840 | 249,894 | 249,894 |
| Short-term borrowings | -- | -- | 208 | 208 |
| Accrued interest payable | 93 | 93 | 51 | 51 |
| Total | \$515, 599 | \$515, 599 | \$438, 889 | \$439, 205 |

The following methods and assumptions were used to estimate the fair value of each class of financial instrument for which it is practicable to estimate that value:

CASH AND OTHER SHORT-TERM INSTRUMENTS For cash and cash equivalents, accrued interest receivable, accounts and drafts payable, short-term borrowings and accrued interest payable, the carrying amount is a reasonable estimate of fair value because of the demand nature or short maturities of these instruments.

INVESTMENT IN DEBT AND EQUITY SECURITIES Fair values are based on quoted market prices or dealer quotes.

LOANS The fair value of loans is estimated by discounting the future cash flows using the current rates at which similar loans would be made to borrowers with similar credit ratings and for the same remaining maturities.

DEPOSITS The fair value of demand deposits, savings deposits and certain money market deposits is the amount payable on demand at the reporting date. The fair value of fixed-maturity certificates of deposit is estimated using the rates currently offered for deposits of similar remaining maturities. The fair value estimates above do not include the benefit that results from the low-cost funding provided by the deposit liabilities compared to the cost of borrowing funds in the market nor the benefit derived from the customer relationship inherent in existing deposits.

COMMITMENTS TO EXTEND CREDIT AND STANDBY LETTERS OF CREDIT The fair value of commitments to extend credit and standby letters of credit are estimated using the fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements, the likelihood of the counterparties drawing on such financial instruments and the present credit-worthiness of such counterparties. The Company believes such commitments have been made at terms which are competitive in the markets in which it operates; however, no premium or discount is offered thereon and, accordingly, the Company has not assigned a value to such instruments for purposes of this disclosure.

LIMITATIONS Fair value estimates are based on existing on- and off-balance-sheet financial instruments without attempting to estimate the value of anticipated future business and the value of assets and liabilities that are not considered financial instruments. Other significant assets or liabilities that are not considered financial assets or liabilities include premises and equipment and the benefit that results from the low-cost funding provided by the deposit liabilities compared to the cost of borrowing funds in the market (core deposit intangible). In addition, tax ramifications related to the realization of the unrealized gains and losses can have a significant effect on fair value estimates and have not been considered in any of the estimates.

Because no market exists for a significant portion of the Company's financial instruments, fair value estimates are based on management's judgments regarding future expected loss experience, current economic conditions, risk characteristics of various financial instruments and other factors. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and, therefore, cannot be determined with precision. Changes in assumptions could significantly affect the estimates.

The services provided by the Company are classified into two industry segments: Information Services and Banking Services which are more fully discussed in Note One. The Company maintains separate financial statements for each of these segments which identify each segment's assets and net income. Revenue from the Banking Services segment is derived primarily from net interest income, which includes both interest income and interest expense. Revenue from the Information Services segment is derived primarily from interest income and fees from its freight and utility payment, rating and processing services.

Summarized information about the Company's operations in each industry as of and for the years ended December 31, 2000, 1999 and 1998, is as follows:

| (In Thousands) | 2000 | 1999 | 1998 |
| :---: | :---: | :---: | :---: |
| Total interest income: |  |  |  |
| Information services | \$19,906 | \$ 15,808 | \$ 15,306 |
| Banking services | 16,691 | 15,215 | 14,910 |
| Eliminations | 468 | (148) | (172) |
| Total interest income | 37,065 | 30,875 | 30, 044 |
| Total interest expense: |  |  |  |
| Information services | -- | -- | -- |

INDEPENDENT AUDITORS' REPORT
The Board of Directors and Shareholders Cass Information Systems, Inc.:
We have audited the accompanying consolidated balance sheets of Cass Information Systems, Inc. and subsidiaries (the Company) as of December 31, 2000 and 1999, and the related consolidated statements of income, cash flows and shareholders' equity and comprehensive income for each of the years in the three-year period ended December 31, 2000. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Cass Information Systems, Inc. and subsidiaries as of December 31, 2000 and 1999, and the results of their operations and their cash flows for each of the years in the three-year period ended December 31, 2000, in conformity with accounting principles generally accepted in the United States of America.
